Frontend Developer / Frontend Engineer

Results-driven Frontend Developer with a dual degree in Computer Science, specializing in building scalable, high-performance web and mobile applications for E-Commerce. Strong expertise in React.js, Next.js, JavaScript (ES6+), TypeScript, Flutter, and modern frontend architectures, including design patterns and Algorithms. Proven ability to deliver SEO-optimized, responsive, and accessible user interfaces with a strong focus on performance optimization, clean code, and best practices, ensuring cross-browser compatibility.

Experienced in full-cycle freelance development, including requirements analysis, UI/UX implementation, API integration, state management, testing, and deployment. Adept at working in remote, distributed teams, collaborating across time zones using Agile/Scrum methodologies, Git-based workflows, and modern CI/CD pipelines. Passionate about open-source contributions, continuous learning, and building user-centric digital experiences that drive business value and enhance logistics.

Education

Future University in Egypt(FUE) & University of Cincinnati - Dual Degree Program, Computers & Information Technology, Bachelor's Degree - GPA 2.71— September 2021 - July 2025

Projects

Veneficus Frontend - E-commerce platform for a luxury fashion brand — 2025

- Built a full-featured luxury fashion eCommerce site delivering bilingual support (English/Italian) via i18next.
- Integrated a realistic 3D product viewer using React-three/fiber to enhance product interactivity and purchase confidence.
- Leveraged Next.js for server-side rendering (SSR) to ensure strong SEO performance and optimized Core Web Vitals.

SpaceTechs Platform & Analytics Dashboard — 2025 ([Link](#))

- Developed a comprehensive ecosystem featuring an interactive 3D portfolio using React Three Fiber and an administrative analytics dashboard using Chart.js.
- Engineered lightweight 3D models and modular data visualization components, ensuring high-performance rendering and seamless mobile responsiveness.
- Implemented Node.js content APIs for dynamic data loading while maintaining SEO-friendly architecture and fast load times.

Neizk Landing Page — 2025 ([Link](#))

- Developed a high-conversion, responsive landing page focusing on minimal load times and modern visual appeal.
- Implemented advanced SEO strategies and integrated Pixel tracking to optimize search visibility and monitor analytics.

Coffee Brain - Integrated Café System & Website (Graduation Project) — 2025 ([Link](#))

- Architected a dual-platform solution comprising a full-stack inventory management system and a responsive marketing website.

- Integrated an AI-powered Barista chatbot for personalized recommendations and reduced manual administrative errors by 30% through automated reporting.
- Engineered the marketing front-end with smooth UI animations and implemented advanced SEO strategies (structured data, meta optimization) to maximize visibility.

Personal Portfolio Website | 2026 ([Link](#))

- Built a high-performance, SEO-optimized portfolio website using Next.js App Router and modern frontend architecture.
- Achieved 90+ Lighthouse scores across Performance, Accessibility, SEO, and Best Practices.
- Improved page load speed by ~30% through SSR, code splitting, and image optimization.
- Designed a 100% responsive, mobile-first UI with a custom design system and smooth animations.
- Implemented dual-audience content (recruiters & clients), increasing clarity and conversion potential.

Work Experience

AI Trainer, Outlier, Remote — February 2024 - Present

- Contribute to the refinement of large language models (LLMs) by evaluating AI-generated code and responses for reasoning quality, accuracy, and alignment.
- Collaborate within a global team to ensure strict adherence to data quality standards and linguistic precision in AI output.
- Gained practical insight into prompt engineering strategies and contemporary model evaluation techniques.

Frontend Developer (Freelancer) — Remote — October 2023 - Present

- Delivered 11 robust web applications using the React and Next.js ecosystems, consistently achieving 90+ Google Lighthouse performance scores.
- Collaborated with 10 clients to translate business goals into technical reality, maintaining a 100% client satisfaction and retention rate.
- Reduced page load times by 30% through optimized rendering strategies (SSR) and efficient state management.
- Engineered bilingual, accessible interfaces that expanded user reach, ensuring 100% compliance with responsive design standards.

Event Organizer, IEEE Student Branch | Future University in Egypt (FUE) — January 2022 - February 2022

- Organized technology events and hackathons, fostering collaboration and effective communication across multidisciplinary teams.

Languages

Arabic (fluent), English (intermediate)

Core Skills

Frontend & Web: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Three.js, React Three Fiber, UI, CSS, user interfaces, cross-browser, front-end, UX, design patterns, Algorithms

Mobile: Flutter, Dart

Backend & Database: SQL, REST APIs, Node.js, Python, Java, C#, C++, Docker, Ubuntu, Linux, Debian, web services

Tools & Platforms: Git, GitHub, Figma, Firebase, VS Code, Android Studio, Kubernetes

Concepts: SEO Optimization, Responsive Design, State Management, Redux, Context API, UI/UX Principles, AI, data science, public cloud, technical documentation, technical specifications, security, artificial intelligence, Computer Science, logistics, shipping, E-Commerce, Collaboration

Certificates

Developing Back-End Apps with Node.js and Express, IBM — December 2025

Foundations of Digital Marketing and E-Commerce, Google — November 2025

HTML and CSS in depth, Meta — November 2025
